Avant Technologies Begins Development on Next-Generation AI-Driven Resource Allocation Solution

LAS VEGAS, April 16, 2024 (GLOBE NEWSWIRE) -- Avant Technologies, Inc. (OTCQB: AVAI) (the "Avant" or the "Company"), an artificial intelligence technology (AI) company specializing in the development of advanced AI and data center infrastructure solutions, announced today that development on its next-generation, AI-driven resource allocation system is fully underway.

In February, Avant announced plans to begin refactoring Avant AI, the Company's highly sophisticated machine and deep learning AI system, to include automated data center resource management as a value-added enhancement for its new high-density compute data center infrastructure, and Avant's management team is extremely pleased with the rapid advancement made so far.

Avant's Chief Executive Officer, Timothy Lantz, said of the progress, "We are excited about the quick development being made on our groundbreaking AI for intelligent data center management. These latest innovations will help our customers unlock new levels of performance and efficiency in their data center operations and achieve success in today's digital era. We anticipate that Avant's AI infrastructure solutions will directly boost our clients' bottom lines and provide a significant competitive advantage in the marketplace."

This groundbreaking initiative aims to leverage the power of AI to optimize resource utilization, enhance performance, and empower businesses with unparalleled agility in their data center operations.

"The demands placed on data centers are constantly evolving," said Danny Rittman, Avant's Chief Information Officer. "Traditional static provisioning and manual configuration methods struggle to keep pace with dynamic workloads and ever-increasing resource needs. Our AI-driven resource allocation system represents a paradigm shift, promising to revolutionize data center management."

Avant Technologies is committed to pushing the boundaries of data center technology and shaping the future of intelligent data center management. Its investment in AI-powered resource allocation underscores this commitment and should begin to position Avant as a leader in this field.

The Company's Avant AI system uses real-time data analysis to predict future resource needs, automatically allocate resources, and adapt to changing workloads. The multi-layered architecture ensures data quality and consistency while translating AI recommendations into actions. Avant AI benefits business by eliminating resource waste, minimizing performance bottlenecks, enabling faster resource scaling, and automating resource allocation for overall operational efficiency gains. About Avant Technologies, Inc.

Avant Technologies, Inc. is an artificial intelligence technology company specializing in creating and developing innovative and advanced AI infrastructure solutions designed to revolutionize the

landscape for AI software development companies and other companies that require immense, scalable computing power, such as scientific simulations, climate modeling, protein folding analysis, and big data processing. The Company also employs its highly sophisticated machine and deep learning AI system, Avant AI[®], to function as both a versatile and customizable AI solution in a host of industries and applications.

Forward-Looking Statements

Certain statements contained in this press release may constitute “forward-looking statements.” Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements because of various important factors as disclosed in our filings with the Securities and Exchange Commission located at their website (<https://www.sec.gov>). In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic conditions, governmental and public policy changes, the Company’s ability to raise capital on acceptable terms, if at all, the Company’s successful development of its products and the integration into its existing products and the commercial acceptance of the Company’s products. The forward-looking statements included in this press release represent the Company’s views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company’s views as of any date after the date of the press release.
